

### Directions for use:

MSM is a naturally occurring, bioavailable sulfur compound. Sulfur is an indispensable nutrient and should be taken daily for optimal health and nutrition.

For dogs and cats we recommend mixing 500 mg MSM powder per 10 lbs of body weight in your pet's food daily. A 4000-milligram scoop (= one teaspoon) is included in each jar.

10 pound pet gets 1/8 teaspoon a day (500 mg.)  
20 pound pet gets 1/4 teaspoon a day (1000 mg.)  
40 pound pet gets 1/2 teaspoon a day (2000 mg.)  
60 pound pet gets 3/4 teaspoon a day (3000 mg.)  
80 pound pet gets one teaspoon a day (4000 mg.)

For horses we recommended feeding three teaspoons (approx. 12 grams) MSM powder twice daily for the first 7 days. Feed one and a half teaspoons thereafter for daily maintenance.
